December 2018

## Department News

Dr. David Penn, a Wagner-Martin Distinguished Professor of Clinical Psychology, has been named by Clarivate Analytics to its [2018 Highly Cited Researchers List](#) for the second year running! Clarivate Analytics has assembled an updated roster of more than 3,300 Highly Cited Researchers. These researchers have distinguished themselves by publishing a high number of papers that ranking the top 1% most-cited in their respective fields over a recent eleven year period. Such consistent production of highly cited reports indicates that the work of these researchers has been repeatedly judged by their peers to be of notable significance and utility. The citation analysis identifies the most frequently cited researchers as determined by the extent to which their papers have supported, influenced, inspired, and challenged other researchers around the globe. It identifies authors who have consistently won peer approval from international researchers in the form of high citation counts. Congratulations, Dr. Penn!

Dr. Eva Telzer, an Assistant Professor in Developmental Psychology, has been selected for a three-year 2019-2021 Jacobs Foundation Early Career Research Fellowship. The Jacobs Foundation Research Fellowship Program is a globally competitive fellowship program for highly talented and innovative young scholars and mid-career researchers from all disciplines. The program supports researchers contributing to improving the living conditions of children and youth and/or to one of the Foundation's thematic priorities. Dr. Telzer was selected as a Jacobs Early Career Research Fellow for her research accomplishments, creativity, and her potential to become a leader in the scientific community to the field of child and youth development. Congratulations, Dr. Telzer!

## *2019 Reznick Grant Awardees*

Congratulations to Dillon Rubalcava and Desman Wilson, recipients of J. Steven Reznick Diversity and Psychological Research Grants for Spring 2019! The Reznick Grant supports students from underrepresented backgrounds or those who are interested in conducting research with, or applicable to, populations traditionally underrepresented in research. The students receiving this \$2,000 award may use the funds to offset the need for other part-time work, to cover the costs of carrying out research, and/or to attend a professional conference.

Dillon Rubalcava is a junior Psychology major who is also majoring in Biology. He has been working in Dr. Kristen Lindquist's laboratory for over two years studying emotions from a psychological constructionist perspective, which posits that emotions emerge from basic psychological "ingredients" (e.g., valence, arousal) that may be situational or individual-specific. Dillon is interested in examining a new emotion-related construct and individual trait he has conceptualized and refers to as "emotional realism." This construct reflects the extent to which an individual identifies with their emotions and uses that affective information in shaping their in-the-moment reality. He speculates that being high in emotion realism may interact with stereotype threat, explaining why people may experience different levels of threat related to, for example, their race/ethnicity or gender.

Desman Wilson is a junior Psychology major who recently started working in Dr. Kurt Gray's laboratory. He is broadly interested in the role of moral responsibility in technology. Desman has particular interests in the context of the criminal justice system where this is increasing use of decision-making via artificial intelligence (AI). However, he points to cases where algorithms intended to be the most fair in parole decisions actually demonstrated clear racial bias, predicting higher rates of recidivism for black defendants, resulting in unfair outcomes. Preliminary research he has been involved in indicates that people are more forgiving when a machine shows racial bias than when a human does, with the difference perhaps due to decreased attribution of moral motivations to machines. Desman hopes to examine different types of bias in the AI context, including racial bias and gender bias, and how people understand machine-generated bias.

Congratulations to Dillon and Desman on receiving this prestigious grant!

We would also like to congratulate three students who received honorable mentions for our 2019 Reznick Grant: Megan Brickner, Ronald Harris, and Jarred Lobo!

Megan is a third-year student working in Dr. Kate Reissner and Dr. Mitch Prinstein's labs. Her research interests are centered on the effect of socioeconomic status on the prevalence and pattern of substance use behaviors among adolescent sexual minority groups. Ronald Harris is a fourth-year student in Dr. Barb Fredrickson's lab. He is interested in positive psychology and how it can be applied to develop simple and cost-effective interventions that can be widely disseminated. Jarred Lobo is a third-year student who recently starting working in a lab at the School of Medicine. He is interested in studying how chronic pain is experienced differently by individuals with a focus on gender and underrepresented groups and examining the biological mechanisms that underlie pain for diverse groups.

Congrats Megan, Ronald, and Jarred for your honorable mentions!

## Research Opportunities for Faculty

If you are interested in applying for any of these opportunities, contact Phil Lee, Grants Management Officer, at [palee@email.unc.edu](mailto:palee@email.unc.edu).
